

# Summer 2013 Update

This latest release, available to all *CLIENT CONNECT* users, provides a number of feature enhancements to *CLIENT CONNECT*.

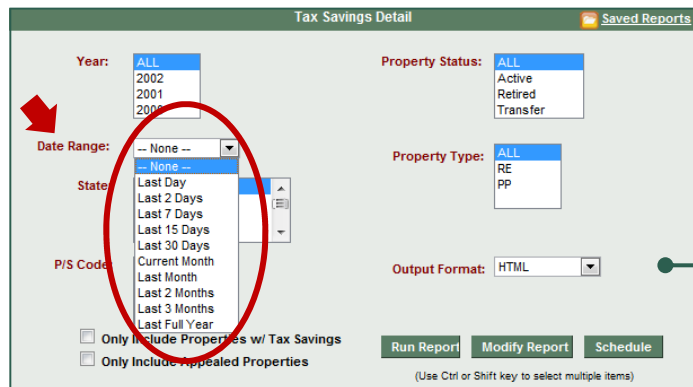

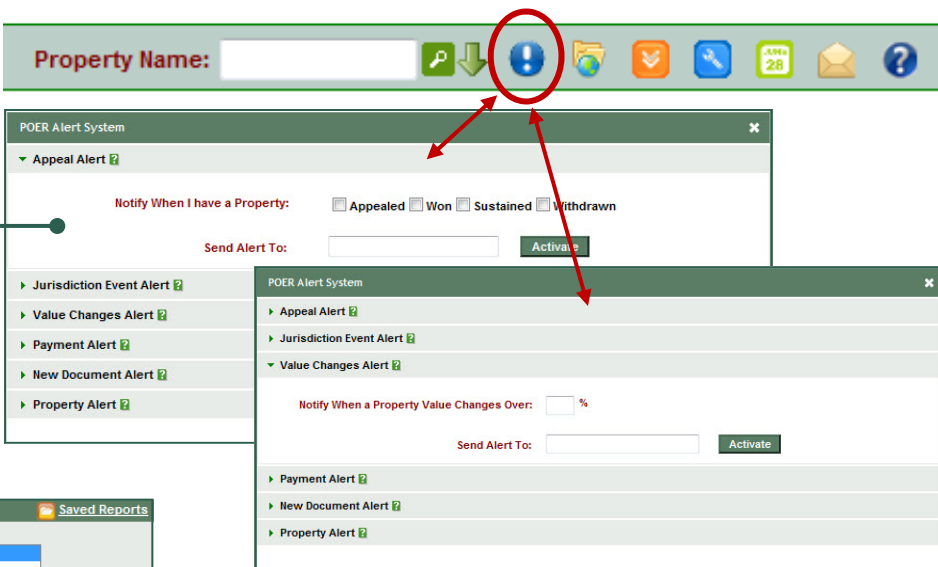

We've added 'POER Alerts' allowing subscribers to receive email alerts for specific events. Standard Reports now have date range options, a great feature for use with 'scheduled' reports. Also within the Standard Reports tab we've added a new 'Tax Worksheet Report'. Our 'Document Center' tab received new parameter and results screens along with an upgraded search engine to speed up search response times. Support is now provided for additional web browsers (IE, Firefox, Safari). Navigation is easier with a 'Back' button added to most drill-down reports and graphs. Finally, we've updated our design and color scheme to deliver a cleaner look and feel with smoother graphing.

Explore all of the new features that *CLIENT CONNECT*'s Summer 2013 release has to offer...

## POER Alerts!

This feature, accessible from the Common Tool Bar (pictured on right), allows you to subscribe to receive email alerts for specific events.

For example, be notified when a property is appealed or when a value changes by a given percentage, etc.

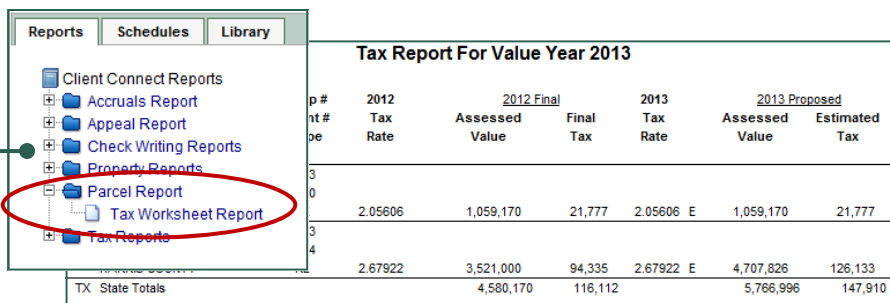

## Range Options for Standard Reports!

This feature provides the ability to select date ranges on most Standard Reports like 'Current Month' or 'Last 7 Days'.

For example, use the range feature to schedule an Appeal Progress Report for any appeals filed in the 'Last Month'.

## New Tax Worksheet Report!

Accessible from the Standard Reports tab, the new Tax Worksheet Report provides values, tax rates and tax savings in one convenient report.

## Updated Look and Smoother Graphing!

Our new design and color scheme delivers better visibility, and all screens and charts have been refreshed with cleaner, smoother graphing.

The screenshot shows the 'Documents List' interface with a 'Modify Document List Display' dialog box. The dialog box has two panes: 'Available Columns' and 'Display Columns'. The 'Available Columns' pane lists various fields like Client Name, Property ID, etc. The 'Display Columns' pane shows 'Tax ID' selected. There are also buttons for 'Select Display Columns: Click Here To Choose...' and 'Select Document Filters: Click Here To Choose...'.

## 'Document Center' Improvements!

A quicker search engine, and enhanced parameter and result screens enable you to find and download the documents you need quicker and with greater ease.

## Support for Additional Web Browsers!

CLIENT CONNECT has been tested for compatibility in today's most popular internet browsers
